

Fictional pregnancy exposure without reaction

Fictional journal — synthetic case for software testing. DOI: 10.0000/fake.case

Abstract

A fictional 29-year-old took Zentaryl in first trimester. No malformation reported at birth in this made-up vignette. Still an identifiable pregnancy case of interest for screening.

Case report

A fictional 29-year-old took Zentaryl in first trimester. No malformation reported at birth in

this made-up vignette. Still an identifiable pregnancy case of interest for screening. General teratology discussion follows.
